Dear Laura

BIODIVERSITY DATA SEARCH: PONTYPOOL SITE (ST30109869)

Thank you for your email of 24 October 2005 requesting biodiversity information for a site in Pontypool. Thank you also for your subsequent emails clarifying your requirements and accepting the quotation we provided (£107.50 + VAT).

Please find enclosed the results of the searches we have undertaken on your behalf. The results comprise:

- A report providing details of records of priority, protected and other importance species in the vicinity of your search area, as well as information on statutory designations and locally identified sites;
- An A3 GIS plot showing locations of species records in the vicinity of your 2km search area;
- An A3 GIS plot showing Phase I Habitat Data within your 2km search area;
- A CD-R providing high resolution images (in JPEG format) of a GIS plot showing statutory designations for a 10km search area, and also the two GIS plots described above.

Please note that part of the 10km search area falls within the Brecon Beacons National Park (BBNP) which is outside the area covered by SEWBR^eC. You are therefore advised to contact the *Biodiversity Information Service for Powys and Brecon Beacons National Park (BIS)* for further information in this area. They can be contacted at 1st Floor Offices, Coliseum House, 7 Wheat Street, Brecon, Powys, LD3 7DG.

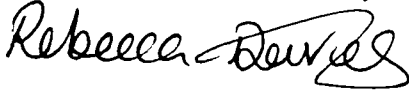

Please also find enclosed two forms that require completion. The first is a 'User Declaration' form. This is a one-off form that must be completed on behalf of your company (as this is your first enquiry to SEWBR^eC). The other form is a 'Data Release Agreement' which must be completed and returned for every enquiry you submit. Please familiarise yourself with the content of these documents as they contain important information governing how you may use the information we have supplied. The satisfactory completion and return of these forms is a condition of the supply of the enclosed information.

Finally, an invoice for £107.50 + VAT to cover the costs of dealing with this enquiry has been sent to your Nottingham office as requested.

Please do not hesitate to get in touch if you require any additional information or if you have any queries or concerns relating to the enclosed information.

Thank you for using South East Wales Biodiversity Records Centre. We look forward to helping you with future enquiries.

Yours sincerely

A handwritten signature in black ink that reads "Rebecca Davies". The signature is written in a cursive style with a large, looping initial 'R'.

Rebecca Davies
Data & Enquiries Officer

BIODIVERSITY INFORMATION SEARCH: PONTYPOOL SITE (ST30109869)

PROTECTED, PRIORITY AND OTHER SPECIES (within search buffer or of relevance to search buffer)

- See accompanying GIS plot (Biodiversity Information Search: Species and Designations)
- SEWBRc has developed a sophisticated search system for reporting the presence of records of species that may be of relevance to a particular enquiry. This system reports all records of priority or protected species that lie within a specified search area, but also reports the presence of mobile high priority species (e.g. mammals, amphibians, certain invertebrates) records of which lie outside the specified search area, but which should be taken into account in ecological assessment due to the possibility of their using land within the search area as part of the territory, or for part of their life cycle. *Records falling within this latter category are marked with an asterisk on the list below.*
- Historical Records (pre-1980) are shown in *italics*.

PROTECTED AND PRIORITY SPECIES

SO286006*	<i>Pipistrellus pygmaeus</i>	Soprano Pipistrelle	14 Oct 2004	Peter Smith	p	Pontypool Leisure Centre	Bat emergence survey. 7 passes were recorded from 18:27hrs. The second one was observed emerging from the corner of the building above the gas room outside the swimming pool.	BAPP, Bonn, EUHS, S74, WCA5	Torfaen Miscellaneous Reports
SO286006*	<i>Pipistrellus pygmaeus</i>	Soprano Pipistrelle	13 Oct 2004	Peter Smith	p	Pontypool Leisure Centre	Bat emergence survey. Seen and heard passing by the building. 1 or 2 appeared to emerge from building but egress point was not identified.	BAPP, Bonn, EUHS, S74, WCA5	Torfaen Miscellaneous Reports
SO286006*	<i>Pipistrellus pygmaeus</i>	Brown Pipistrelle	Oct 2004	Peter Smith	p	Pontypool Leisure Centre	Internal Survey of building. Maternity roost found in the south east end of the Planum Major in the area at the top of the stair well.	BAPP, Bonn, EUHS, S74, WCA5	Torfaen Miscellaneous Reports

South East Wales Biodiversity Records Centre

Report produced: 31 October 2005

Usage of the above data is restricted by the terms of the associated User Declaration and Data Release Agreement. Key issues: past records of presence of a habitat or species do not guarantee continued occurrence; absence of records does not imply absence of a species; merely that no records are held at SEWBRc; SEWBRc cannot guarantee the accuracy of supplied data; copyright of records remains with the original recorder.
