CERTIFICATE OF ANALYSIS

Date: 26 February, 2006
Our Reference: 05/12588/02/01-01
Your Reference: Soil
Location: PONTYPOOL

A total of 1343 samples was received for analysis between Wednesday, 24 August 2005 and Thursday, 03 November 2005 and completed on Tuesday, 17 January 2006. Accredited laboratory tests are defined in the log sheet, but opinions, interpretations and on-site data expressed herein are outside the scope of ISO 17025 accreditation. We are pleased to enclose our final report, it was a pleasure to be of service to you, and we look forward to our continuing association.

Should this report require incorporation into client reports, it must be used in its entirety and not simply with the data sections alone.

We are accredited to MCERTS for sand, clay and loam/topsoil, or any of these materials- whether these are derived from naturally occurring soil profiles, or from fill/made ground, as long as these materials constitute the major part of the sample. Other coarse granular materials such as concrete, gravel and brick are not accredited if they comprise the major part of the sample.
